

One unified solution: Claude Code + Claude Enterprise

Enterprise admins can upgrade users to **premium seats** that **include more usage and Claude Code**—bringing our app and powerful coding agent together under one subscription.

Users can move seamlessly between ideation and implementation, while admins get the visibility and controls they need to scale Claude across their organization.

Claude Code with Claude for Enterprise

- **Unified intelligence:** Bring AI-powered development and advanced reasoning together in a single subscription
- **Uninterrupted workflows:** Continue conversations with Claude with extra usage and spend controls for predictable pricing
- **Enterprise security and controls:** SSO/SCIM, Audit logs, Claude Code usage dashboards and more

What's included

- **Extra usage:** Continue past usage limits with pay-as-you-go billing at the API sticker price to push work with Claude forward without interruption
- **Mix and match seats:** Assign standard or premium seats according to individual user requirements and roles
- **Self-serve seat management:** Purchase new seats, directly manage seat allocation and provision users through the admin panel
- **Granular spend controls:** Set spending limits at the organization, seat type and individual user level
- **Usage analytics:** Track Claude Code metrics like lines of code accepted, suggestion accept rate, and usage patterns
- **Managed policy settings:** Deploy and enforce settings across all Claude Code users to match internal policies

Integrated developer workflows across Claude Code and C4E

Make informed architecture decisions

Claude for Enterprise

Research unfamiliar frameworks or libraries in Claude with interactive Q&A

Claude Code

Use Claude Code to build a production-ready implementation

Evaluate & implement designs

Claude for Enterprise

Explore different architectural approaches and evaluate trade-offs

Claude Code

Implement the chosen architecture

Maintain system reliability

Claude for Enterprise

Write technical specs and user stories in Claude, refine them through discussion

Claude Code

Feed technical specs to Claude Code as context for generating implementations

Early customer insights

*“Claude Code and Claude have **accelerated Altana's development velocity by 2-10x**, transforming how we build sophisticated AI/ML systems that facilitate multi-party collaboration on large-scale knowledge graphs of global supply chains. We're taking on significantly more ambitious projects as a result.”*

Peter Swartz, Co-founder and Chief Science Officer

“Since adopting the Claude Code + Claude for Enterprise bundle, we've rolled it out to hundreds of developers, and it has quickly become our go-to pair programmer. Its coding assistance consistently outperforms other agents, delivering superior results and value every day.”

Artem Pikulin, Senior Manager Machine Learning Operations
